

FUKUSHIMA IS HERE

NEXT STEPS FOR GLOBAL RESPONSE

Saturday, October 19, 2013

Thanks for being “on the beach” today, and raising awareness of this global CRISIS. When more people who love life step up and take a few simple actions, we have a better chance of preventing further catastrophe.

Our tasks are more straightforward now that Japan is finally calling for international aid:

- SPEAK UP** (choose one or more)
 - Fukushima Response will be launching a California Campaign in the coming weeks focusing on getting Governor Brown to speak out. Meanwhile, please call or fax his office, asking for immediate testing of our food and water for radiation with widespread publication of the results.
Governor Jerry Brown, c/o State Capitol, Suite 1173, Sacramento, CA 95814
Phone: (916) 445-2841 Fax: (916) 558-3160 <http://gov.ca.gov/home.php>
 - Contact your local municipalities – City Council, County Board of Supervisors, etc., and ask them to adopt a resolution on Fukushima (examples available at our website).
 - Write to your newspapers, join blog discussions, share info on Facebook (search for Fukushima Response, Focus on Fukushima Collective, Rainbow Warriors, I Joined the Wave) and talk to your friends and relatives ~ help raise awareness of the urgent need for international action.

- SIGN & FORWARD PETITIONS:** E.g., Harvey Wasserman’s petition demanding the world community take over the crisis at the Fukushima site has over 98,000 signatures. It will be presented at the UN in the next couple weeks. <http://www.nukefree.org> (Right-hand side of home page.)
Look for direct links to this and other petitions on our website’s “Actions” page.

- SHOW YOUR SUPPORT** by changing your Facebook profile photo to highlight the call for international aid and assistance. More info on this and many other ideas will be posted on the “Actions” page on our website www.fukushimaresponse.org.

- SHARE THESE NEXT STEPS** with 5 other people (take a copy, make copies).
Have your friends and allies join us. We need many thousands to rise together to find solutions and let government leaders know the people **INSIST** upon immediate response to Japan’s call for help.

- SEND YOUR ENERGY** through positive thoughts, prayers, blessings, meditations, etc.
Perhaps visualize protection of the rods hanging precariously in reactor #4, as well as healing for all ocean life and the children and people of Japan who are suffering. Imagine that humans come together swiftly to activate our collective genius and find solutions not yet imagined. Picture that we collaborate like never before to remediate the current levels of radiation in the environment and stop any further contamination.

To continue to be a part of this collective effort to sound the alarm, and safeguard the viability of our planet for future generations, please visit our website and join our mailing list:
