

WIN A GEIGER COUNTER!

Win an IMI Inspector Alert V2 radiation monitoring device manufactured by International Medcom in Sebastopol Value: \$699

This is the latest version of the popular Medcom Inspector. It will detect Alpha, Beta, Gamma and X radiation.

Support the FukushimaResponse "Whalesong Radiation Monitoring Project" to track radioactive contamination in Sonoma County: testing food, water, soil and air.

It's been over 5 years since the reactors exploded at the Fukushima Daiichi nuclear power plant in Japan. Since then we have been working to assess any impact on our Northern California community.

Be aware: Learn, measure and avoid unnecessary exposure to radioactivity.

Geiger counter demonstrations & training available by request from the FukushimaResponse team.

Samples properly submitted will be screened and also analyzed for key gamma emitting radionuclides including Cesium 134 and Cesium 137.

This fundraiser is aimed at augmenting our equipment!

The equipment and services we would like to purchase and provide include:

- A Kromek high sensitivity Multi-Channel Analyzer
- Continued Pacific Ocean water sampling
- 10 geiger counters to train & equip regional citizen scientists
- Operational costs to test submitted samples & publish reliable data

This equipment is very expensive, but we believe an independent source of data is important since no data is available from our government.

Thank you for your support.

Raffle entry: 1 chance for \$5, 3 for \$10

Winner drawn: 10:30 am, Thursday, Nov 10, 2016

Where: Monthly meeting of FukushimaResponse
Apple Box Restaurant
224 B St, in Petaluma CA

You need not be present to win.

Please make checks payable to "Peace & Justice Center" (and note in memo area "for FR") — Raffle entries may be mailed to FukushimaResponse.org, 2210 Aaron Court, Petaluma CA 94954
